Re: **Group leader position in the Becher-lab**

The Institute of Experimental Immunology at the University of Zurich, Switzerland, has a history of over 30 years of immunological research and is composed of four independent research groups sharing state-of-the-art equipped laboratory spaces.

We invite applicants for a **Group Leader (*Oberassistent*)** position with post-doctoral experience and a good track record. Expected is a strong background in mouse immunology, and molecular biology. Her or his research interest should be in *in vivo* models of tumor immunology, autoimmunity or cytokine biology. Apart from developing an independent research portfolio, the successful candidate is expected to secure extramural funding. He/She will be assisting in general lab management, administration and supervision of graduate students and post-docs. We offer a competitive salary, an attractive start-up package and a highly synergistic and collegial atmosphere within a young research team. Our institute is embedded in a strong, collaborative research environment at the beautifully located Science Campus of the University of Zurich.

Applications should include a brief description of your proposed research projects (1 page), a CV, list of publications and the contact information of 3 referees. These documents should be sent as a single PDF file, with your name as the file name, to Ms. Ines Scholz ([applications@neuroimm.uzh.ch](mailto:applications@neuroimm.uzh.ch)) until Oct. 28 2010
