ERASMUS LECTURES ON GENETICS
2006

FEBRUARY 16
ALAN LEHMANN
‘The replication of damaged DNA, new DNA polymerases and cancer avoidance’

MARCH 16
DANNY HUYLEBROECK
‘Connecting TGFbeta family actions in vertebrate embryogenesis and human disease’

MAY 11
PICO CARONI
‘Life-long remodeling of brain circuits regulated by experience’

JUNE 1
TOMOYUKI TANAKA
‘Kinetochore capture and bi-orientation on the mitotic spindle’

JUNE 15
DIMITRIS KIOUSSIS
‘Imaging the development of the lymphoid system’

SEPTEMBER 14
WENDY BICKMORE
‘Chromosomes and Gene Expression’

OCTOBER 12
ORI PELES
‘Role of cell adhesion molecules in myelination and the local differentiation of myelinated axons’

NOVEMBER 16
WINSHIP HERR
‘Regulating the human chromosome cycle’

Place: Lecture hall 4 or 7, Erasmus MC, Dr. Molewaterplein 50, Rotterdam
Time: 16.00 hrs
For more information, please contact Jasperina Erades (secretary to the Department of Cell biology and Genetics) or consult our webpage: www.eur.nl/fgg/ch1/lectures
Tel: +31 10 408 7199
Fax: +31 10 408 9468
Since 1995
Background picture: Neurofascin binds to a Schwann cell surface molecule
